

Austrian Pine **(Pinus nigra)**

50' to 70' by 20' to 40' wide evergreen tree, pyramidal and dense when young with age becomes flat-topped with spreading branches and umbrella shape

Needles 4" to 6" long

Cones shiny yellow-brown, 2 to 3" long

Very striking bark on mature trees, thick gray-brown to silvery plates

Needs full sun, relatively adaptable to most soils, fairly tolerant of heat, pollution, urban conditions, salt tolerant

Evergreen tree useful as a specimen, a windbreak or screen, in mass plantings, urban plantings, and highway and seaside planting requiring salt-tolerance.

European native.
