

Project Oceanology

Sponsored by: Northeast Association of Conservation District Employee

Maximum: 56

Come explore the wonders of the Long Island and Fishers Sound on a 52-foot Enviro-Lab research vessel for an unforgettable science experience from Marine educators or Marine Biologist.

They will engage, entertain, and explore Long Island Sound's diverse marine life with participants on facilities that are equipped with technology that is not readily available in today's classroom. Tools & equipment will be available to delve deeper into the scientific techniques along with exploring the research methods.
